Ph: +61 (0) 409 644 056

Mintech-TA offers the dynamic and complex nature of the regulatory and legislative training to mitigate risk and achieve full compliance with the Australian Standards and health and safety act.

Mintech-TA's training solutions have been 'rehearsal for the real world'. We've helped organisations raise awareness for hundreds of employees and their business partners across the globe, enabling them to 'do the right thing'. This promotes a stronger, more financially sound organisation and protects its good name and image, all the while meeting the standards mandated by individual companies.

In addition to a full suite of standard Engineering Services, Mintech-TA offers a number of additional specialised services locally, nationally and internationally, including: Hazardous area inspections, Electrical maintenance and installations, Mechanical Plant maintenance.

Training is currently offered in the following: Hazardous Areas, Electrical Engineering Manager (EEM), Switchboard rescue training, High Voltage Training, Arc Flash awareness, Detailed Inspection for EX Protection Equipment, Isolation Lockout Procedures, Safe Operation Procedures, Project Management.

Mintech-TA are able to tailor these courses to suit your industry requirements, raising awareness and maintaining competence within the field and providing a complete training solution to the electrical Industry.

Mintech-TA prides itself on compliance to the Standards Act and Regulations
